

Tried & True

My experience with the Dr. Ashley Engle and the staff at Audiology & Hearing Aid Services has always exceeded my high expectations and has been a very pleasant experience. They are very friendly and professional and treat my hearing disability with real concern. They are glad to help and answer any questions.

Dr. Engle is compassionate, very easy to speak with and extremely knowledgeable about current technology. She puts you at ease in making sure everything is working for you before you leave.

I have been going to Audiology & Hearing Aid Services for nearly 35 years and I am always pleased to refer anyone to them because they have genuine concern for their patients.

V. Haston 04/01/2018

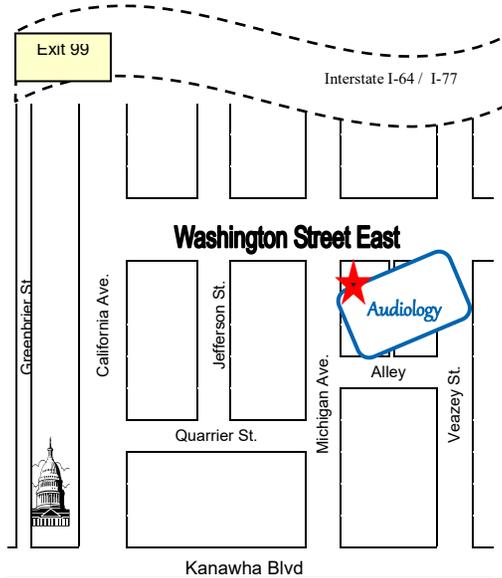

.....
I was first referred to Audiology and Hearing Services, LLC in 1978 while still attending college. Over the years, I have had the opportunity to work with the staff in just about every capacity as a client. When the need for new hearing aids became apparent, I received the required hearing exams and screening. When being fitted for new hearing aids, I have always received the most advanced devices for my specific hearing loss. When repairs became necessary, my hearing aids were quickly sent for repair and returned just as swiftly and I was given loaner aids for the duration of the repair process. The staff of Audiology and Hearing Services are kind and compassionate, and always patient.

At any time, if adjustments are needed or I have concerns about the level of my hearing or the performance of my hearing aids, the staff always works with me to ensure I have a timely appointment. I am always seen on time and my visits are never rushed. With the advanced equipment on the market, fine tuning each hearing aid may take a couple visits, but the satisfaction of the client is always number one.

I have never actually felt like a "client" at Audiology and Hearing Services. Respect, professionalism, and compassion combined with knowledge of both the client and the latest hearing equipment are all the reasons anyone should need to contact this great group of hearing professionals. I am comfortable and confident that I am receiving the best hearing aid services possible.

Our sense of hearing

is of vital importance in our lives. It allows us to carry on conversations with our family and friends, and it helps us learn new information. It alerts us to danger and gives us a sense of connectedness to our world.

Those who have lost their ability to hear adequately often suffer from feelings of isolation and depression because of their poor hearing. For people who experience hearing loss, hearing aids often can improve their ability to hear sounds, music and the voices and speech of others. Most importantly, hearing aids can improve their quality of life and help them to hear what matters most.

At Audiology and Hearing Aid Services, LLC., we believe in using technology to make that happen. We provide a wide variety of instruments to best serve the needs of our patients. Initial consultation for demonstration of hearing aids is without obligation.

Our Audiologists

Our certified Audiologists, are fellows of the American Academy of Audiology, hold Certificate of Clinical Competence in Audiology from The American Speech-Language-Hearing Association and are members, members of West Virginia Audiology Association, and are members of American Academy of Audiology.

Ashley Engle, Au.D., CCC-A, F.A.A.A.

Dr. Engle received her Bachelor of Science degree in Communication Disorders from Marshall University, Huntington, WV in 2004. She received her Doctorate in Audiology from Ohio University, Athens, OH in June 2008 at which time she joined Audiology and Hearing Aid Services, Inc.

Her professional interests include diagnostic, pediatric, and auditory brainstem response testing as well as fitting and programming the latest technological advancements in hearing aids.

Katheryn S. Monk, Au.D., CCC-A, F.A.A.A.

Dr. Monk received her Bachelor of Science degree in Speech Pathology and Audiology from West Virginia University in 1994. In 1995 she earned her Master of Science degree in Audiology also from West Virginia University. In 2010, she went on to obtain her Clinical Doctorate in Audiology (Au.D.) from Salus University's distant learning program in Philadelphia.

Dr. Monk specializes in adult and pediatric diagnostics, hearing aid fittings, and the assessment and management of tinnitus.

Service & Support

* Diagnostic Audiometry

We provide hearing tests for all ages using clinically calibrated equipment. We also conduct workers' compensation testing.

* Hearing Aid Evaluation

Our real ear measurement systems can electro acoustically test and record the performance of any hearing aid while it is worn.

* Hearing Aid Dispensing

Customer service and the best technology are important to us. We carry the widest variety of hearing brands and models in West Virginia, including Widex technology to better meet your needs. All hearing aids are sold on a 60-day trial basis. We cooperate with many insurance plans and with state and federal agencies.

* Hearing Aid Repairs

Almost all brands of hearing aids can be serviced in our lab or shipped overnight to the manufacturer for repair.

* Battery Sales

Batteries for all major hearing aid brands are available in our office and by mail. Our Battery Club offers savings on all battery types.

* Educational Amplification Systems

Our office provides auditory trainers and services for children in educational settings.

* Pediatric Hearing Testing

We use auditory brainstem response testing, visual reinforcement audiometry and other special techniques for determining the auditory status of infants and young children.
